PROFESSIONAL SUMMARY

Fullstack developer with hands-on experience building scalable, production-grade features across React/Next.js frontends and Node.js/Express/Django backends. Skilled in REST API design, MongoDB and PostgreSQL data modeling, and end-to-end feature delivery in Agile teams. Strong track record of improving application performance, reliability, and code quality through testing, monitoring, and code review.

EXPERIENCE

Software Developer Intern | WhatBytes (Remote)

Feb 2026 – Present

- Built full-stack features end-to-end using React, Next.js, TypeScript, Node.js/Django, and PostgreSQL designing REST APIs and managing data flow between frontend and backend systems.
- Integrated Stripe payment processing to enable secure, end-to-end payment workflows.
- Deployed 3+ projects and migrated 1 production application on AWS (EC2, RDS, S3, Amplify), improving scalability and reliability.
- Wrote 200+ unit and end-to-end tests (Jest, Playwright), strengthening code quality and release confidence.
- Integrated Sentry and Posthog for production monitoring, cutting time-to-detect and time-to-debug on live issues.

Software Developer Intern | Razorpod (On-site, Gurugram)

Jul 2025 – Oct 2025

- Improved website performance by 35% through component optimization, caching strategies, and code refactoring.
- Built responsive, accessible UIs in Next.js using SSR, SSG, and ISR to improve load times and SEO.
- Integrated REST APIs and Strapi CMS to power dynamic, scalable content management.
- Delivered features end-to-end while applying Agile, DevOps, and CI/CD practices.

MERN Stack Developer Intern | GRID R&D (Remote)

Jun 2025 – Aug 2025

- Developed and optimized responsive web applications using React.js, Node.js, Express, and PostgreSQL.
- Designed and shipped an invite feature enabling users to send and manage invitations, boosting user engagement by 25%.
- Debugged and resolved 20+ frontend and backend issues, improving application stability and reducing bug reports.

PROJECTS

SecureKeep

Tools: Next.js, Node.js, TypeScript, JWT, MongoDB, Tailwind CSS, Nodemailer

- Built a secure credential-management backend with AES-256 encryption and JWT-based authentication.
- Designed RESTful APIs with server-side validation, authentication, and authorization.
- Applied OOP and modular design principles for maintainable, testable backend code.

Storely – Cloud Storage

Tools: Next.js, Appwrite, Tailwind CSS

- Built backend APIs for file upload, sharing, and access control on a cloud storage platform.
- Implemented OTP-based authentication and secure data handling.
- Optimized backend performance for reliability under multiple concurrent users.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java

Frontend: React.js, Next.js, Material UI, HTML, CSS, Tailwind CSS, Redux

Backend: Node.js, Express.js, Django, REST APIs, JWT

Database: MongoDB, PostgreSQL, MySQL

Tools/Platforms: Git/GitHub, Docker, AWS, CI/CD, Prisma, Cloudinary, Stripe, Sentry, Posthog, Jest

Other: OOP, Data Structures & Algorithms, Design Patterns, Agile, Web Vitals

EDUCATION

Guru Gobind Singh Indraprastha University | 2022 – 2026

Bachelor of Technology in Information Technology — CGPA: 9.2/10

CERTIFICATIONS

- SQL & Relational Databases — IBM
- Machine Learning with Python — IBM
